

July 2, 2020

Good afternoon. We have a couple items we wanted to share with you.

Health Information

It is important right now that you have a complete understanding of your health profile, especially as it relates to your job as an educator. It may play a role in how the District handles staffing needs as we plan for opening the 2020/2021 school year.

Summer break is a good time to get in touch with your health provider to schedule a check up. There may be a wait for appointments, so we are suggesting you plan ahead and start thinking about this now.

[Find the CDC lists here](#) for information about people at increased risk and people who should take extra precautions as related to COVID-19.

Insurance Information - Open Enrollment Begins Soon!!!

Please take the time to look at our email update sent on 6/22/2020 for all the information about making plan changes, costs, etc. You can find that update [here](#).

2020/2021 School Year Information

We continue to remain in constant contact with both CTA and the District to discuss plans for reopening. At this point they still have not decided anything, but will hold a study session with the School Board in July to discuss options. We assume this will be open to the public as would be a regular school board meeting, and we will share specific dates and times as we get them. Be sure to participate and have your voice heard!

[Here are CTA's Resources for Educators for COVID-19](#) Lots of good information!

Sincerely,

Carissa Carrera
